## Accessing RemoteApps by using a Mac

Use the following procedures to set up RemoteApps on a Mac.

1. Please download and install the Microsoft Remote Desktop App from the Mac App Store.

2. Open the app and click on Remote Resources.

3. The Remote Resources dialog box will appear.

Remote Resources	
Domain\user	
Password	
Refresh	
	Remote Resources

4. In the URL section, please enter https://remote.hockerill.com/RdWeb/Feed Enter your Username and Password in the following sections (Please enter the domain before your username, as shown below). Click Refresh.

	Remote Resources
URL	https://remote.hockerill.com/RdWeb/Feed
User name	haec\woollardr
Password	
	Refresh

5. Click Continue when the Verify Certificate dialog box appears.

000	Verify Certi	ficate
G	The host name did not match a certificate, The certificate is s certificate has expired	any of the valid hosts for this elf-signed, and untrusted, The
	Show Certificate	Cancel Continue

6. The Remote Resources screen will appear again, this time with Successfully loaded Remote Resources below the Refresh button. Close the Remote Resources dialog box.
