E-SAFETY!

VIRUS DETECTED

E-SAFETY of THE INTERNET

TAKE A STAND AGAINST CYBER BULLIES >> STOP THE BULLYING

PROBLEMS!

social media

Be careful of what you post on social media, make sure that your parents would approve with the things you post.

Spam

Please be aware of your email because some people hack into banks and so they post something to your email account and try to get your personal details

Getting hacked!

Getting hacked is not a good thing, make sure you keep your password safe and email address, also keep your profile safe do not share your personal things to other people.

SEXTING...
A MISTAKE YOU CAN NEVER TAKE BACK

meeting somebody.

Be careful when you messaging somebody and the person you are talking to says to meet up if you are going to meet up make sure you bring an adult with you.

virus

virus is when something that can go into your computer it damage your computer, so when ever there is a pop up and it says

"do you want a money DO NOT CLICK on it ! because it can close down your compute computer.
