

Product analysis

This design is very good as it tells the customer how many calories and whatnot are in it. It also seems to be made of a strong and protecting plastic.

This design is very clever as it is made of hard to break plastic. But is still very moveable, I do not know if it is recyclable.

This carton is a classic design. It is made of strong and easy to open plastic. It is recyclable and easy to mass produce. This is the best design.
