

Main Character Description

By Shahadat Ullah

In our drama, the main character is the mum. She is a single mum, who is unemployed and lives with her dad (grandpa), her sister (aunt), twin sons and a little son. Due to her stress when working in the house and looking after the children, she starts having memory problems, making her mix up days in the calendar (for example, she thought a normal day was her sister's birthday). Mum has a relationship with her sister, she is in around her 20's, and is a stressed out, but sometimes joyful person.

The grandpa already suffers from dementia and Alzheimer's disease, and this causes short-term memory loss. He always talks about the war of 1987. One of the twins is a quiet, but civilised person. He is glued to his book, and doesn't stop unless the boy must. On the other hand, the other twin is a game-addict, who plays games 24/7. He eats junk food, especially crisps. The youngest boy, is very annoying to the other family members, and doesn't quit. The aunt helps the mum in her chores around the house, since the dad divorced her years ago, she is quite short-tempered.
